

# STACK OVERFLOW DEVELOPER SURVEY

IME INYANG

7TH AUGUST, 2023.

# OUTLINE

---

- Executive Summary
- Introduction
- Methodology
- Results
  - Visualization – Charts
  - Dashboard
- Discussion
  - Findings & Implications
- Conclusion
- Appendix

# EXECUTIVE SUMMARY

---

- Data Contextualization and Analysis
- Methodology Description
  - Data gathering
  - Data analysis
  - Data visualization
- Results presentation (supported with graphs and trends)
- Discussion of the overall findings and implications regarding results exposed.
- Final conclusions

# INTRODUCTION

---

- This survey is the most comprehensive and largest survey of people who work with different programming languages (developers) around the world.
- Results are not are not a total representation of everyone in the developer community.
- Trends to predict the next direction for developers.
- Characterization of developers around the globe.

# METHODOLOGY

---

- Collect Data survey & explore its context
  - APIs
  - Web Scraping
  - Request library
- Data Wrangling
- Exploratory Analysis
  - Analyzing data distribution
  - Handling Outliers
  - Correlation
- Data Visualization
  - Data distribution, relationships and comparison of data.
- Dashboards

# RESULTS

---

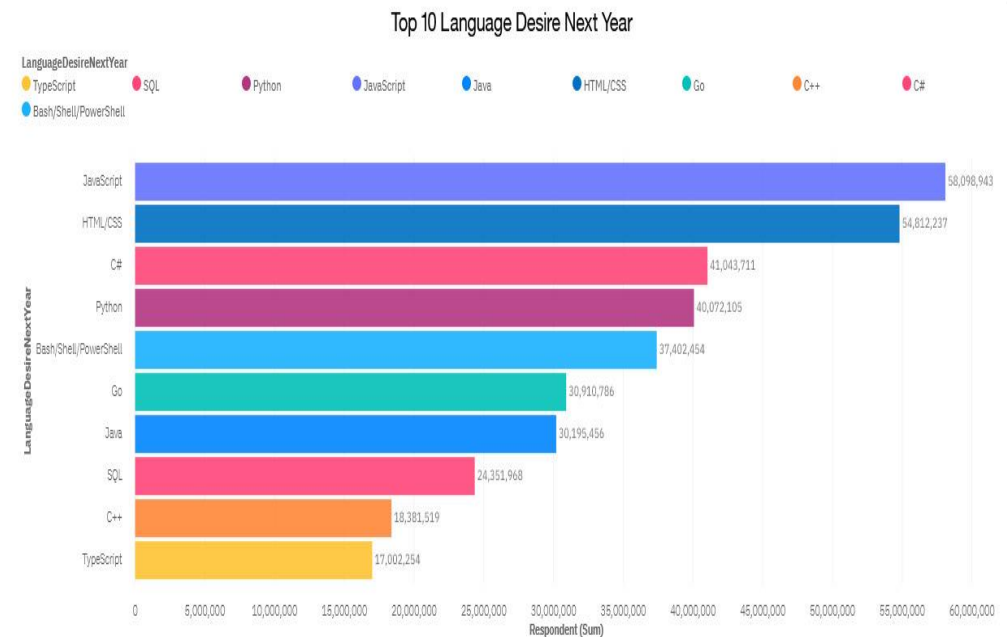

# PROGRAMMING LANGUAGE TRENDS

## Current Year

## Next Year

# PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

---

## Findings

- Javascript remains the leading language even after a great decline.
- There's been in a great interest in C#
- There is a great decline in PHP

## Implications

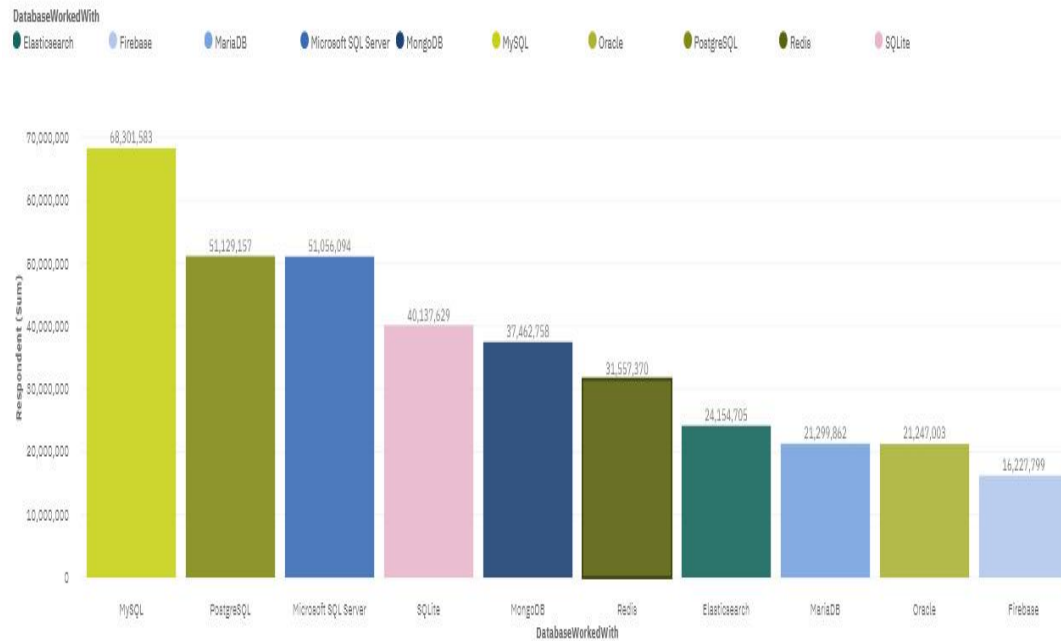

- Possible migration of developers from Javascript to C#

# DATABASE TRENDS

## Current Year

Top 10 Database Worked With

## Next Year

Top 10 Database Desire Next Year

# DATABASE TRENDS - FINDINGS & IMPLICATIONS

---

## Findings

- MySQL is most used database
- Increasing interest in PostgreSQL and MongoDB
- Lack of interest in Microsoft SQL server and SQLite

## Implications

- PostgreSQL and MongoDB establishment in market
- Microsoft SQL server and SQLite losing recognition.

# DASHBOARD

# Demographics

Respondent classified by Gender

Gender  
● Woman ● Man

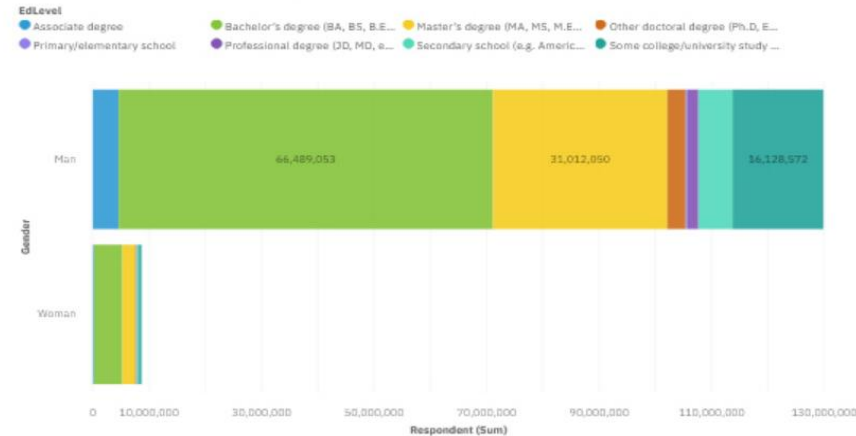

Respondent Count for Countries

Respondent Count by Age

Respondent Count by Gender, classified by Formal Education Level

# DISCUSSION

---

# OVERALL FINDINGS & IMPLICATIONS

---

## Findings

- JavaScript widely used language.
- Over 93% young male developers
- Developers mostly in developed countries.
- Majority of developers have Bachelor's degree.

## Implications

- JavaScript web frames gaining followers
- Global polarization of developers gender.

# CONCLUSION

---

- A good of popularity trend of different platforms and languages can be obtained.
- Work has to be done to shift the labor market to developing countries.
- Developers have marked characteristics.
